

"The Alivening Weekend Retreat"

Barbara and Glenn Smyly have been presenting the Alivening Weekend Retreat for more than 25 years around the country and have supported many thousands of people in healing themselves physically, mentally, spiritually, emotionally, financially, with their parents, with their children, sexually, in their job and careers and all other aspects of life.

They would personally like to invite you to join them for your Alivening Weekend Retreat.

The next available Alivening Weekend Retreat in Florida is October 13th, 14th & 15th. The Retreat will be conducted in a private home. The participants will either stay at that home the entire weekend or go to their home after the evening sessions.

You should wear comfortable clothing, bring your own personal toiletries, towel, sleeping bag and pillow. The tuition for the Weekend is \$500 and includes all the food, however the participants will share house-keeping, food preparation and clean-up duties.

Topics of discussions will be:

- The distinction between listening & hearing (often the source of upsets in all our relationships).
- Responsibility (his/hers/ours/others)
- Stands (the power of giving your word)
- The distinction between Love and Sex
- The impact of Birth and your experience of your Birth.
- Cycles and Patterns (your re-occurring circumstances and how you create them)
- Healing and Transforming your Relationship with your Mother/Father
- Money Makeover (identify, complete and change your original decision about money).
- Death, A self-fulfilling prophecy? (Helps you overcome your conscious or subconscious fear of aging and/or death)
- Merge with God - Immortality (a spiritual discussion)
- Recreating your Ideal Birth.

In addition to these conversations we include writing exercises, eyes closed meditations, group interactions, exercises and discussions. *You will reveal to yourself the truth about your life and the truth will set you free.* The Alivening Weekend Retreat will help you identify, understand and complete the causes of the physical circumstances happening in your life and empower you to make the necessary changes to improve the quality and circumstances of your life.
