SACRED MEALS

2600 Years ago in order to attend the Pythagorean Academy one had to fast on air, water, and sunshine for 40 days and nights. Once accomplished, upon entrance to the academy, an initiate was given a shoulder strap pouch filled with a fresh "millstone crushed hand assembled Golden Measured Meal" that Pythagoras himself referred to as the "Meal of Hercules".

Pythagoras and his student in secret and with great reverence "passed mouth to ear" the name **Phei Pei**, and its formula of sacred geometric ratios one to another in hopes of preserving the knowledge of this precious gift to mankind down through time.
